The Academy of Information Technology is well renowned for providing quality education in IT, Multimedia and Animation. AIT is the first education institute in Australia to provide computer games design technology and Motion Capture technology in our curriculum combined with the use of interactive VIRTTOOLS software. AIT has been using and teaching Motion Capture for 5 years and is the only licensed Virtools trainer in Australia. Motion Capture technology is utilised to create human like movement in animation and to create special effects. Virtools is a behaviour engine and real-time renderer and is the best commercial tool that offers a complete range of features that enables users to construct virtual environments and Artificial Intelligence. AIT's dynamic curriculum allows students to create computer games to industry level therefore, giving them an edge in a creative career. AIT offers a wide range of courses from certificate III level through to Advanced Diploma courses. AIT's computer games/multimedia courses offer comprehensive skills in Graphic Design, Web Design, Digital Printing, 2D and 3D animation, Video Editing, Motion Capture Animation, Game Production, Artificial Intelligence and Virtual Reality.
