The academic programs in the School of Architecture, Landscape Architecture and Urban Design at the University of Adelaide are unique given the collaborative nature of architecture and landscape architecture, with all students gaining an understanding of the foundations of both professions, and many students undertaking a double degree. There is also an alternative graduate study pathway into design in digital media. The School also is unusual in the way courses are organised around clusters of interrelated issues with design at the core. The teaching staff includes a powerful mixture of design scholars with international reputations and experience. The learning environment of this School provides graduates the ability to combine critical thinking with creative action. Students develop professional ethics and an individual sense of aesthetics while acquiring the skills of design. During the program written, oral and graphic communications are emphasised along with the effective use of contemporary digital media.

Head and Chair of School: Professor Nancy Pollock-Ellwand  
CRICOS Provider: 000123M

Application dates:

Computer Graphics  
Digital Media  
Art History & Theory  
Indigenous Art  
Professional Practice

## AWARDS

Bachelor of Design Studies  
3 years full time/part time equivalent  
[www.architecture.adelaide.edu.au](http://www.architecture.adelaide.edu.au)  
Majors in: Architectural Studies, Landscape Studies and Architectural and Landscape Studies. The first degree, a three-year Bachelor of Design Studies (B.Des.St.), can be taken alone or as the first part of professionally accredited academic programs of either a Master of Architecture (M.Arch.) or a Master of Landscape Architecture (M.L.Arch.) with the added option of a double-degree of M.Arch./M.L.Arch. Alternatively, the Bachelor of Design Studies program provides a study pathway for students who wish to undertake the School's graduate Master of Design in Digital Media program. The multidisciplinary core and broad range of elective courses in the B.Des.St. foster intellectual development, critical thinking and creative action. Although most graduates continue in one of the professional programs of architecture or landscape architecture or Digital Media program, some follow careers in information technology, environmental design, media and publications, arts or other fields.

## Master of Architecture

2 years full time  
[www.architecture.adelaide.edu.au](http://www.architecture.adelaide.edu.au)  
The Master of Architecture (M.Arch.) is a professionally accredited program in the practice of architecture, open only to graduates who have achieved the required level of academic performance in the B.Des.St. (Architectural Studies major) program, or equivalent. This is a two-year intensive studio-based and project-oriented program that develops professional and creative abilities in a context of contemporary theory and practice. Projects are used as the basis for learning, discussion and review. Some projects lead students through technical, administrative, planning or other specific aspects of practice, with others promoting innovative approaches to design with a more open agenda. Students complete an Architecture Masters Dissertation during the final year as well as a major design project that permits students to demonstrate their acquired

knowledge in the design and description of a project of significant complexity and scale.

## Master of Landscape Architecture

2 years full-time  
[www.architecture.adelaide.edu.au](http://www.architecture.adelaide.edu.au)  
The Master of Landscape Architecture (M.L.Arch.) is a professionally accredited program in the practice of landscape architecture, open only to graduates who have achieved the required level of academic performance in the B.Des.St. (Landscape Studies major) program, or equivalent. This is a two-year intensive studio-based and project-oriented program that develops professional and creative abilities in a context of contemporary theory and practice. Projects are used as the basis for learning, discussion and review. Some projects lead students through technical, administrative, planning or other specific aspects of practice, with others promoting innovative approaches to design with a more open agenda. Students complete a Landscape Architecture Masters Dissertation during the final year as well as a major design project that permits students to demonstrate their acquired knowledge in the design and description of a project of significant complexity and scale.

## Master of Architecture/Master of Landscape Architecture

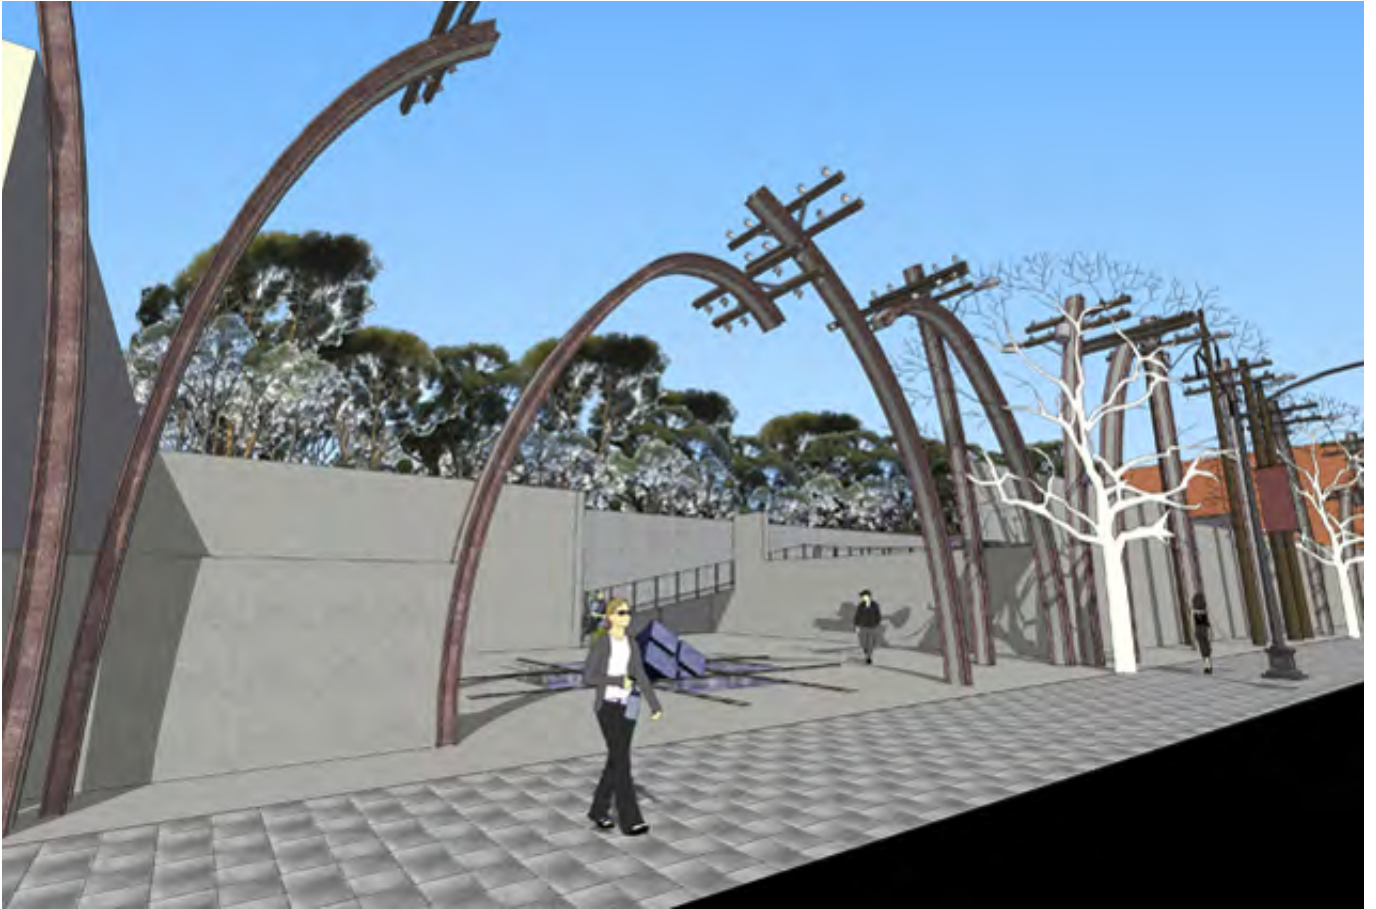

3 years full time  
[www.architecture.adelaide.edu.au](http://www.architecture.adelaide.edu.au)  
A 3-year double-degree Master of Architecture/Master of Landscape Architecture is available to suitable qualified graduates of the Bachelor of Design Studies (Architectural and Landscape Studies major).

## Master of Design in Digital Media

3 semesters full-time  
[www.architecture.adelaide.edu.au](http://www.architecture.adelaide.edu.au)  
The Master of Design in Digital Media (M.Des.Dig. Med.) is built upon three core activities -academic scholarship, research and innovation, and professional practice. The program allows artists, architects, landscape architects and designers to develop a unique personal approach to art and design that integrates the use of digital media. It aims to advance students' knowledge and skills developed in prior studies in art and design, and focuses on reflective practice and digital media production for a variety of outputs including print, web, broadcast film/TV, movies and disc. Modern technologies are part of the research emphasis and students are expected to explore current state of the art products, systems and services and are encouraged to pursue excellence within a framework of industry relevance and personal discovery. All students are provided with their own workstation in the Digital Media Studio and industry connections are encouraged so that a wide range of digital careers are possible through the development of multi-skilled digital media postgraduates.
